Servicing • Installations • Pump Stations • Drainage • Tankers

CALL 24/7

07540 357289

Who we are.

Pump specialists for homes, businesses and industry.

South East Pumps installs, services, replaces and repairs every type of pump system across the South East UK and Greater London. From a single shower booster in a London flat to multi-pump packaged stations on commercial developments, we deliver the same engineering rigour on every job.

Our engineers cover foul waste and sewage pumping stations, sump and ejector pumps, booster sets and pressurisation units, circulation pumps, rainwater harvesting and borehole systems. We specify, supply and commission pumps from every major brand — Grundfos, Wilo, Lowara, Stuart Turner, Salamander, Jung, KSB and more.

We also operate as part of the wider Ascot Drainage group, giving us in-house tanker capacity for septic tanks, cesspits, petrol interceptors, roadside gullies and emergency flood-relief pump-outs — all backed by 24/7 response and a 12-month workmanship guarantee.
