

• Available 24/7 across the South East & London

Pump servicing, repair & waste water management for homes, businesses & industry.

South East Pumps are specialists in pump servicing and pump repair — plus installation and replacement — for residential, commercial and industrial systems across Berkshire, Surrey, Hampshire and London.

20+
YEARS OF EXPERIENCE

24/7
EMERGENCY RESPONSE

500+
PUMPS INSTALLED

100%
INSURED & GUARANTEED

Specialist engineering. Practical solutions.

For homes, commercial premises and industrial sites.

South East Pumps delivers pump repair, servicing and installation alongside pump supply, drainage and tanker support. From a failed sump pump to a new pumping station, our team helps keep essential systems working.

We support homeowners, property managers, facilities teams and developers with planned maintenance, replacement equipment and 24/7 emergency callouts.

- Sump, sewage and submersible pumps
- Booster sets and pressure systems
- Float switches, seals and impellers
- Control panels and alarm faults
- Performance checks and planned servicing
- Replacement options when repair is not viable

24/7 EMERGENCY SUPPORT

07346 123399

Built for the job.

New installations, replacement pumps and pumping-station upgrades.

Site survey & specification / Equipment supply / Pipework & controls
Commissioning & handover

Clear the problem. Keep things moving.

Planned waste removal and emergency pump-outs.

DRAINAGE

- Blocked drains and drainage faults
- CCTV drain inspections
- Gully and interceptor cleaning

TANKER SUPPORT

- Septic tanks and cess pits
- Chamber and wet-well emptying
- Flood-relief pump-outs

The right pump. Supplied right.

Specification and supply of waste water pumps and pumping equipment.

01 Sewage & submersible pumps

Foul water and sewage pumps for pump chambers, plant rooms and basements.

02 Sump & drainage pumps

Sump and drainage pumps that keep waste water moving away from the property.

03 Pumping stations & treatment

Equipment for sewage treatment plants, pumping stations and cesspits.

04 Controls, alarms & panels

Control panels, float switches and high-level alarms to keep systems protected.

GRUNDFOS / WILO / LOWARA / STUART TURNER

Real sites. Hands-on expertise.

A selection of work from our existing project gallery.

Site support, pumping equipment and chamber works.

Project photos show the environments and systems our team works with.

Less disruption. More peace of mind.

A practical approach to essential equipment maintenance.

01 Understand the system

Discuss your site, equipment and priorities before recommending the right support.

02 Inspect & service

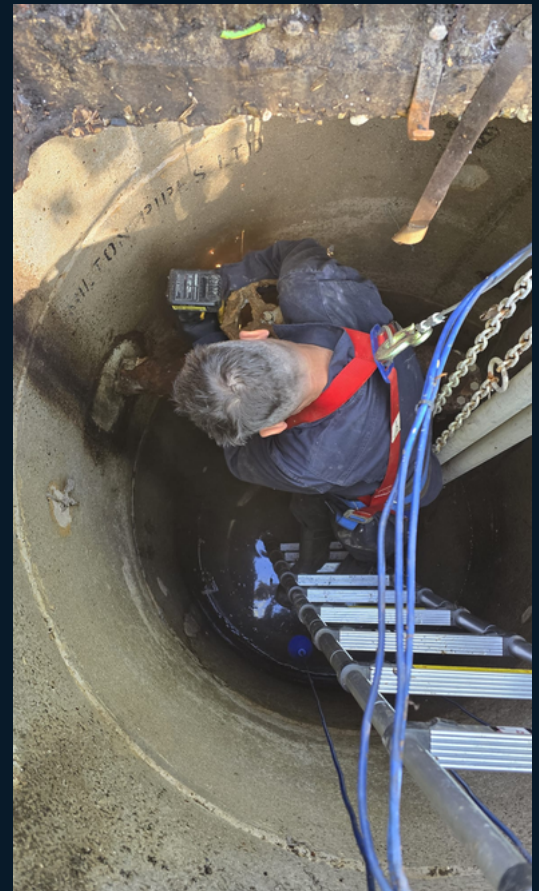

Check operation, identify wear and carry out appropriate servicing.

03 Repair or replace

Explain faults and the available options so you can make an informed decision.

04 Plan ahead

Arrange ongoing servicing to help identify problems before they become emergencies.
